To whom it may concern,

Thank you for the opportunity to provide comment on the proposed supervised practice guidelines for medical radiation practice.

Graduates from University of South Australia's 4 year Bachelor of Medical Radiation Science (Nuclear Medicine) are eligible for general registration however from 2013 onwards they are required to do supervised practice for a minimum of 6 months and less than twelve months.

For this reason, their circumstances should be included under the headings of 'Scope' in this document as general registrants who are required to do a period of supervised practice. Currently they are not represented in this document.

Kind regards

T. Albrecht
